k. Description of Request: The Androscoggin Reservoir Company (licensee) proposes to administratively remove from the project license the existing 23.5-mile-long, 34.5-kilovolt transmission line. The licensee specifies that the transmission line, which is

owned by Central Maine Power Company, should no longer be included in the license as a primary line because the line does not solely transmit power from the project to the interconnected grid, but also transmits power from the grid to the customers of the utility. Further, the licensee states that the point of interconnection of project power with the transmission grid occurs at the existing substation located adjacent to the powerhouse.
